13 May 1959

MEMORANDUM TO: Chief, Mobilization and Military Personnel Division

SUBJECT : Staffing of a XI Operational Group

1. The decision has been made to move the European Air assets to the XI and the military personnel who will man the Squadron are all to be detailed to the Agency. Although the definite location of the Squadron will not be known until 15 May it has been determined that it will be in the [redacted] area.

25X1

2. Plans call for the Squadron to be operational by 1 September. Because this request is being made at such a late date it will be especially appreciated if it receives expeditious handling and if close follow-up on each individual case can be made.

3. Special mention needs to be made with regard to the Twin Engine Instructor Pilots and Flight Engineers. The aircraft involved is not a standard inventory item in the Air Force and the limited number of personnel qualified in this craft have been especially trained by the Agency at considerable expense. Therefore it appears necessary to make name requests for these particular individuals.

4. The primary support for [redacted] and personnel being rotated from this unit will be the best source possible for our needs.
